Subject: Wednesday community meeting

Hello Eden, Jim and Pam.

Members of FACHEP and those that are working on the NSF rapid grants focused on the PoU filters will be holding a community meeting Wednesday evening to provide project updates and allow the community to ask questions regarding our work. We will not be providing and new FACHEP results or information beyond what we have shared with you and has already been released. We will be trying to place some of these results in context to provide a better understanding. We are framing this as a discussion with community members and we have not invited media and we are not issuing a press release or statement. I'm happy to provide slides shared at the meeting once they are complete.

I wanted to give you a heads up that this is happening. Please let me know if you have questions.

Shawn
