I've received some notes with interest in a discussion on how we go forward with the PoU study and have received some individual input from some of you. At this point in time, I have heard support for holding on any reporting of results until we have completed all analyses, including Enterobacteriaceae. I am in agreement, but would be happy to discuss further. I have been reading more about the Enterobacteriaceae tonight and believe this is a very important part of the story.

Next week is tough but please indicate if you can handle a call regarding PoU study and follow up to discussion with CDC:

Monday 10/31, 3:30 pm

Wednesday, 11/2, between 8 and 11 am

Thursday, 11/3, 9-10

The earlier, the better, so please be flexible.

Nancy
