

YOU CAN'T HANDLE DR. LOVE'S "TRUTHS"

[In emails September 25 and 27, 2016 to colleagues McElmurry and Masten](#), Dr. Love expressed a desire to keep Dr. Pruden at arm's length as she obtained more data on *Shigella* and developed her personal manifesto related to POU filter use in Flint. Love's [illogical analysis](#) was heavily based on her ignorance of basic potable water science and false assumptions about of filter deployment in Flint, yet her newly formulated recommendation was to eventually be cast in concrete:

" ... I think it is best to take filtered water, boil it, and then refrigerate for drinking. This provides *two*** barriers (more in concert with our gold standard of multiple barriers) ... It is what I am starting to do in my own house in Ann Arbor... and I cannot in good conscience recommend otherwise to the citizens of Flint, especially given the average health condition of its citizens.**

It is truly unfortunate that Dr. Love never had a chance to learn basic principles of [Sloan MoBE 101](#), because she had literally scared herself via DNA analysis of Ann Arbor POU filters, to the point that she was actually boiling potable water for her own family. That is perfectly fine, because as we say, to each their own. Millions of Americans make such personal choices every day to either boil their water, purchase bottled water, use filters of many different designs, or even [expose themselves to "raw" water](#).

Yet Dr. Love would soon become dead set on applying her newly minted "gold standard" to all of Flint, and inexplicably, only to Flint. At one level, this was merely formalizing Dr. Sullivan's "insider" FACHEP "boil water" recommendations already posted on Facebook and Dr. Love's warnings to residents like Keri Webber. The emails further [reveal](#) that because Dr. Pruden would be incapable of handling Dr. Love's ideas on filter messaging, she would be put in limbo until Dr. Love's "interesting but incompletely analyzed" data on *Shigella* was processed — at that time Pruden could be dazzled by Love's brilliance after the Mayor, GCHD, U.S. Environmental

Protection Agency (EPA), MDHHS and CDC were informed first (see 9/25 to 9/27/2016 emails at the end).

But as we will eventually see, not one of those entities would be able to handle Dr. Love's illogical "truths" either. And so it was henceforth destined, that Dr. Love would be pitted against the entire relief effort on the POU water filter issue, supported only by FACHEP sycophants. Moreover, in her supreme arrogance, Dr. Love was going to hopelessly outnumber and outvote everyone, and take her "gold standard" public one way or another.
