Thanks, Susan. The ending has a significant section that I will work on integrating what we now know from CFR we communicated about, so it will be ready for you to work on tonight. With figures, SI, etc I think we can have it basically done by tomorrow if not tonight. I want to talk strategy with Shawn as to actual submission date, but we are definitely NOT waiting until Dec 31. **Bruce is expecting it by this coming Tue morning latest**, but there is a chance that if we get it up tomorrow (Sat), it will be distributed then or at least Bruce will look at it and declare it appropriate for review so the process can start. If it is accepted minor reviews, there is a chance we can get it in **asap form by Jan 10** (actually, Jan 11 is the important date, I think).

Nancy and Shawn

I deleted the google doc. I've only had a chance to review the introduction and haven't been able to add the sections you requested. I'm attaching the introduction as I wanted to get this to you before I go back to spending time with family.

I'll work on whatever is the latest version tonight. Are we working to submit this by tomorrow or Dec 31?

Hard to believe but the version Nancy sent didn't include some of the edits I made before going to bed. Nancy and I were using Google docs to write simultaneously. **Anyway, I food generate an opening paragraph. I'll try to add and circulate. Still need an abstract and closing.**

Subject: Re: ES&T letters paper - first read

Thank you for making this a priority. If you need me to write the paragraph on what happened in Flint just let me know - I've written and presented on that so many times I could pretty much write it in my sleep.

All: Shawn and I have been working to bring together a draft of the ES&T Letters paper that we are trying to **expedite and have out (if it reviews well) by around January 10.** ES&T letters can provide a 2 week turnaround in most cases, but with the holidays it is a bit iffy **(but we've been in touch with the editor, so he is going to try and work with us).** We are trying to get this uploaded by SATURDAY morning.

We have pitched this invitation to be part of the paper to all of you, so please let us know whether you want to be included or not as a co-author as we will need to list you officially when the paper is uploaded. We do feel everyone on this email is part of the story as we've discussed these results over the last few months over and over again.

It is still rough in some places, and we've called out some of you in other places. Thank you for whatever comments you can provide. PLEASE USE TRACK CHANGES AND NOTES in word so we can see your comments. Note that once Shawn and I both get some sleep, we'll be able to look at this with new eyes.
